

# GROOVED CONCENTRIC REDUCER

## MODEL 701

### Pipe Material

- Carbon steel, Schedule 10, Schedule 40.

For use with alternative materials and wall thicknesses please contact ARGCO.

### Maximum Working Pressure

- Up to 300 psi/20 bar

### Function

- Joins carbon grooved pipe system to flange components

### CERTIFICATIONS/LISTINGS

Underwriters Laboratories, Underwriters Laboratories Canada, Factory Mutual.

### SPECIFICATIONS - MATERIAL

**Housing Sections:** Ductile Iron conforming to ASTM A 536, Grade 65-45-12.

### Housing Coating:

Standard: Orange Enamel

Available: Hot Dipped Galvanized

### User Responsibility for Product Selection and Suitability

Each user bears final responsibility for making a determination as to the suitability of ARGCO products for a particular end-use application, in accordance with industry standards and project specifications, and the applicable building codes and related regulations as well as ARGCO performance, maintenance, safety, and warning instructions. Nothing in this or any other document, nor any verbal recommendation, advice, or opinion from any ARGCO employee, shall be deemed to alter, vary, supersede, or waive any provision of Allied Rubber and Gasket Company's standard conditions of sale, installation guide, or this disclaimer.

### Note

All products to be installed in accordance with current ARGCO installation/assembly instructions. ARGCO reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.

### Installation

Reference should always be made to the ARGCO installation instructions of the product you are installing.

### Warranty

Refer to the Warranty section of the current Price List or contact ARGCO for details.

## Grooved Couplings or Fittings

Grooved couplings are used to join pipe and fittings in both wet and dry sprinkler systems. Unless otherwise noted, these couplings are intended to provide some flexibility in piping systems. Typical applications are in sprinkler risers, in feed mains passing through walls from one building area to another, in locations subject to earthquakes, in the discharge line from aboveground pump suction tanks, in new connections to existing feed mains and in air or water fire service lines subject to excessive vibration or difficult alignment.

Unless otherwise noted, these couplings are limited to use with rolled or cut groove-ended pipe, valves and fittings, at a minimum rated working pressure of 175 psi (1205 kPa) and are suitable for aboveground service. Higher rated pressures are noted in the text of the listing. Selection of pipe schedules for use with grooved pipe couplings should be made according to applicable FM Global Property Loss Prevention Data Sheets installation standards. These pipe schedules determine system pressure ratings and may take precedence over the higher rated working pressures listed for some couplings.

Installation must be made according to the manufacturer's instructions and requirements. Where couplings are used to join FM Approved pipe, the pipe manufacturer's installation instructions and requirements must also be observed. Grooves should be made according to ANSI/AWWA C606 (latest edition), "Grooved and Shouldered Joints", unless otherwise specified.

FM Approved grooved pipe couplings joining steel pipe may be used in underground service, subject to the installation restrictions placed upon the pipe and to the coupling manufacturer's recommendations and requirements.

Unless otherwise stated in the listing, these couplings have been evaluated for a maximum ambient temperature of 225°F (107°C), suitable for use in normal warehouse protection. For special applications, temperatures, or environments, the manufacturer's recommendations and requirements are to be followed.

## Grooved Split Flanges-Flexible

Split Flanged-These fittings join pipe, valves or fittings having equal diameters.

### Model 007

Product Description	Nominal Pipe Size, in./mm	Pipe Ends	Remarks	Max Working Pressure, psi
007	2, 2-1/2, 3, 4, 5, 6, 8 76, 108, 133, 140, 159, 165 mm	Cut Grooved Rolled Grooved	a, b, c, d, e	300 (2070)

#### Remarks:

- Minimum schedule cut groove pipe to be joined: 6 in. NPS and smaller – Schedule 40; 8 in. and larger – Schedule 30.
- Minimum schedule rolled groove pipe to be joined: 6 in. NPS and smaller – Schedule 10S; 8 in. NPS and larger – 0.188 in. (5 mm) wall.
- With EPDM gasket.
- For use with Chinese Standard GB/T 3091-1993, GB/T 3092-1993 welded steel pipe with pipe wall thicknesses comparable to same size ASME B16.10M-2000, Schedule 40 pipe (8 in. NPS – Schedule 30).
- For use with Chinese Standard GB/T 17395-1998 seamless steel pipe with pipe wall thicknesses comparable to same size ASME B16.10M-2000, Schedule 40 pipe (8 in. NPS – Schedule 30).
